

ASHE Healthcare Construction Workshop - HCC

Tuesday and Wednesday

January 23, 2018 (8:00 am – 5:00 pm)

January 24, 2018 (7:45 am – 3:30 pm)

at ABC's Keystone Center for Construction Careers

Keystone Chapter

Seminar Description:

Learn the language of healthcare construction, the latest trends in technology and design, and address the compliance issues that healthcare providers face as you learn what you encounter while working on construction projects. In addition, this program increases your awareness of the inner workings of a healthcare facility helping you become a valuable member of the healthcare team. Many entities require this certification prior to bidding on a job. Online course must be completed prior to the classroom training. Limited number of participants due to interactive nature of this training.

This program is hosted by the Keystone Chapter Associated Builders and Contractors. Those who register for this training will not be able to transfer to another course due to separate registration processes.

Benefits of Attending:

Market your knowledge of working in a healthcare environment.

The ASHE Healthcare Construction (HCC) Certificate shows that you have been trained to work in the healthcare construction environment and can help you position yourself as a desirable candidate for healthcare construction jobs.

The HCC Workshop combines an e-learning program and a two-day seminar that offers education on critical topics in healthcare construction including: the healthcare planning, design, and construction process; Life Safety Code® compliance; construction risk assessment; mechanical, electrical, and plumbing systems (MEP); medical gas systems; medical technology; communication; and project expectations.

You will gain an understanding of the latest compliance issues in healthcare construction and learn what owners, staff, and patients expect of constructors working in the healthcare environment.

Learning Outcomes:

- Articulate factors that are unique to the planning, design, construction, and renovation of healthcare facilities and implement best practices based on those factors.
- Implement plans for providing a safe healthcare environment during construction and renovation of healthcare facilities.
- Identify codes and standards compliance issues that are impacted during planning, design, construction, renovation, and implement measures to ensure compliance.

Facilitate and effectively participate in communication with the healthcare construction or renovation project team and stakeholders.

Who Should Attend:

Contractors, healthcare facility managers, and construction project managers will benefit from this workshop.

ASHE Healthcare Construction Workshop - HCC

Tuesday & Wednesday
January 23, 2018 (8:00 am – 5:00 pm)
January 24, 2018 (7:45 am – 3:30 pm)

at ABC's Keystone Center for Construction Careers

Keystone Chapter

"Very well organized. Speakers show a great amount of compassion. I learned a good amount of new skills that I will be able to apply to my knowledge base."
 - Joe DiMauro, A/Z Corporation

"This course has provided me with knowledge to take on my first healthcare project with confidence and to effectively manage my construction team while communicating intelligently to the healthcare facility managers and clinical staff."
 - Caleb Smith, Welliver

"This training was a huge benefit for me in expanding my knowledge of the healthcare construction industry. I will recommend it to others in our company who are doing, or might do, healthcare construction projects."
 - William Schick, Project Superintendent, E. Allen Reeves
