7.19.19

Providence Engineering is excited to announce the promotion of Bart Foreman, P.E. to *Manager, Distribution & Warehouse Facilities Design*.

Previously, as a Project Manager, Bart provided exceptional design and project management services for many clients in the distribution/warehouse market. Leveraging his 12 years of professional experience, Bart will now formally lead Providence's Distribution & Warehouse Facilities Design Department.

In this new role, Bart will ensure that Providence, and our clients, remain at the forefront of the warehouse market by blending efficient design principles with the adoption of innovative construction technology.

"I'm excited to welcome Bart to these new responsibilities" says David Bernhardt, President. "As evolving consumer behavior increases the demand for new warehouse space, so too grows the demand for experienced and qualified design teams. Under Bart's leadership, Providence will continue to provide exceptional warehouse design services for clients throughout the country."

Established in 1992, Providence Engineering provides structural design and analysis services to the building industry. We create dependable, innovative solutions that have earned the trust of architects, owners, contractors and those we are privileged to call our clients.
